Problem

In the current pandemic situation, the necessity of shifting various government application process like (Pension Application, Aadhar application etc) to online is very high.

The pandemic has increased the death rate of elderly people in India, it is our duty to protect them. By preventing them from stepping out to public places we will able to reduce the spread of virus to an extent.
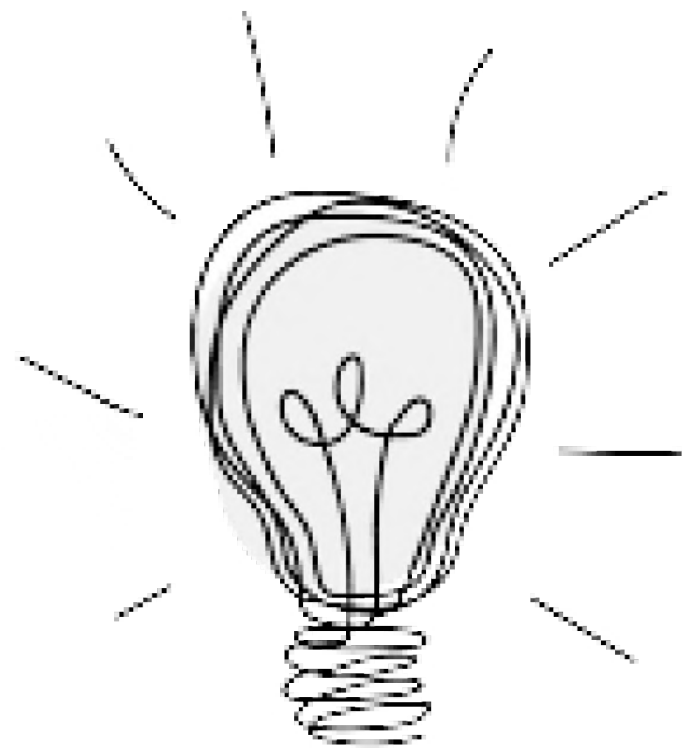

E-governex

Who are affected ?

Elder people

Patients

Disabled

4

Solution

An android application which provides services from various government departments.
People can register on the application and receive services from the required departments without stepping out of house.

Pitch

5

Services Available

Application for pension, Aadhar etc

Can check application status

Benfactors

Elderly people

Patients

Disabled

Common people

Government Employees

E-governex

Implementation Approach

We will be creating a user-friendly application using flutter where people can register by entering their basic details.

After login they can apply according to their needs.

Once applied users will be able to check the status of their application

E-governex

Expected Results

Application processes in various government departments completely shifted to online and thereby avoiding

long queues

crowd

paper work

wastage of time

**Transportation costs**

Future Enhancements

Integrating with government

In future we will be integrating the details of all government projects so that people are able to understand the merits and demerits of the project directly from the government authorities
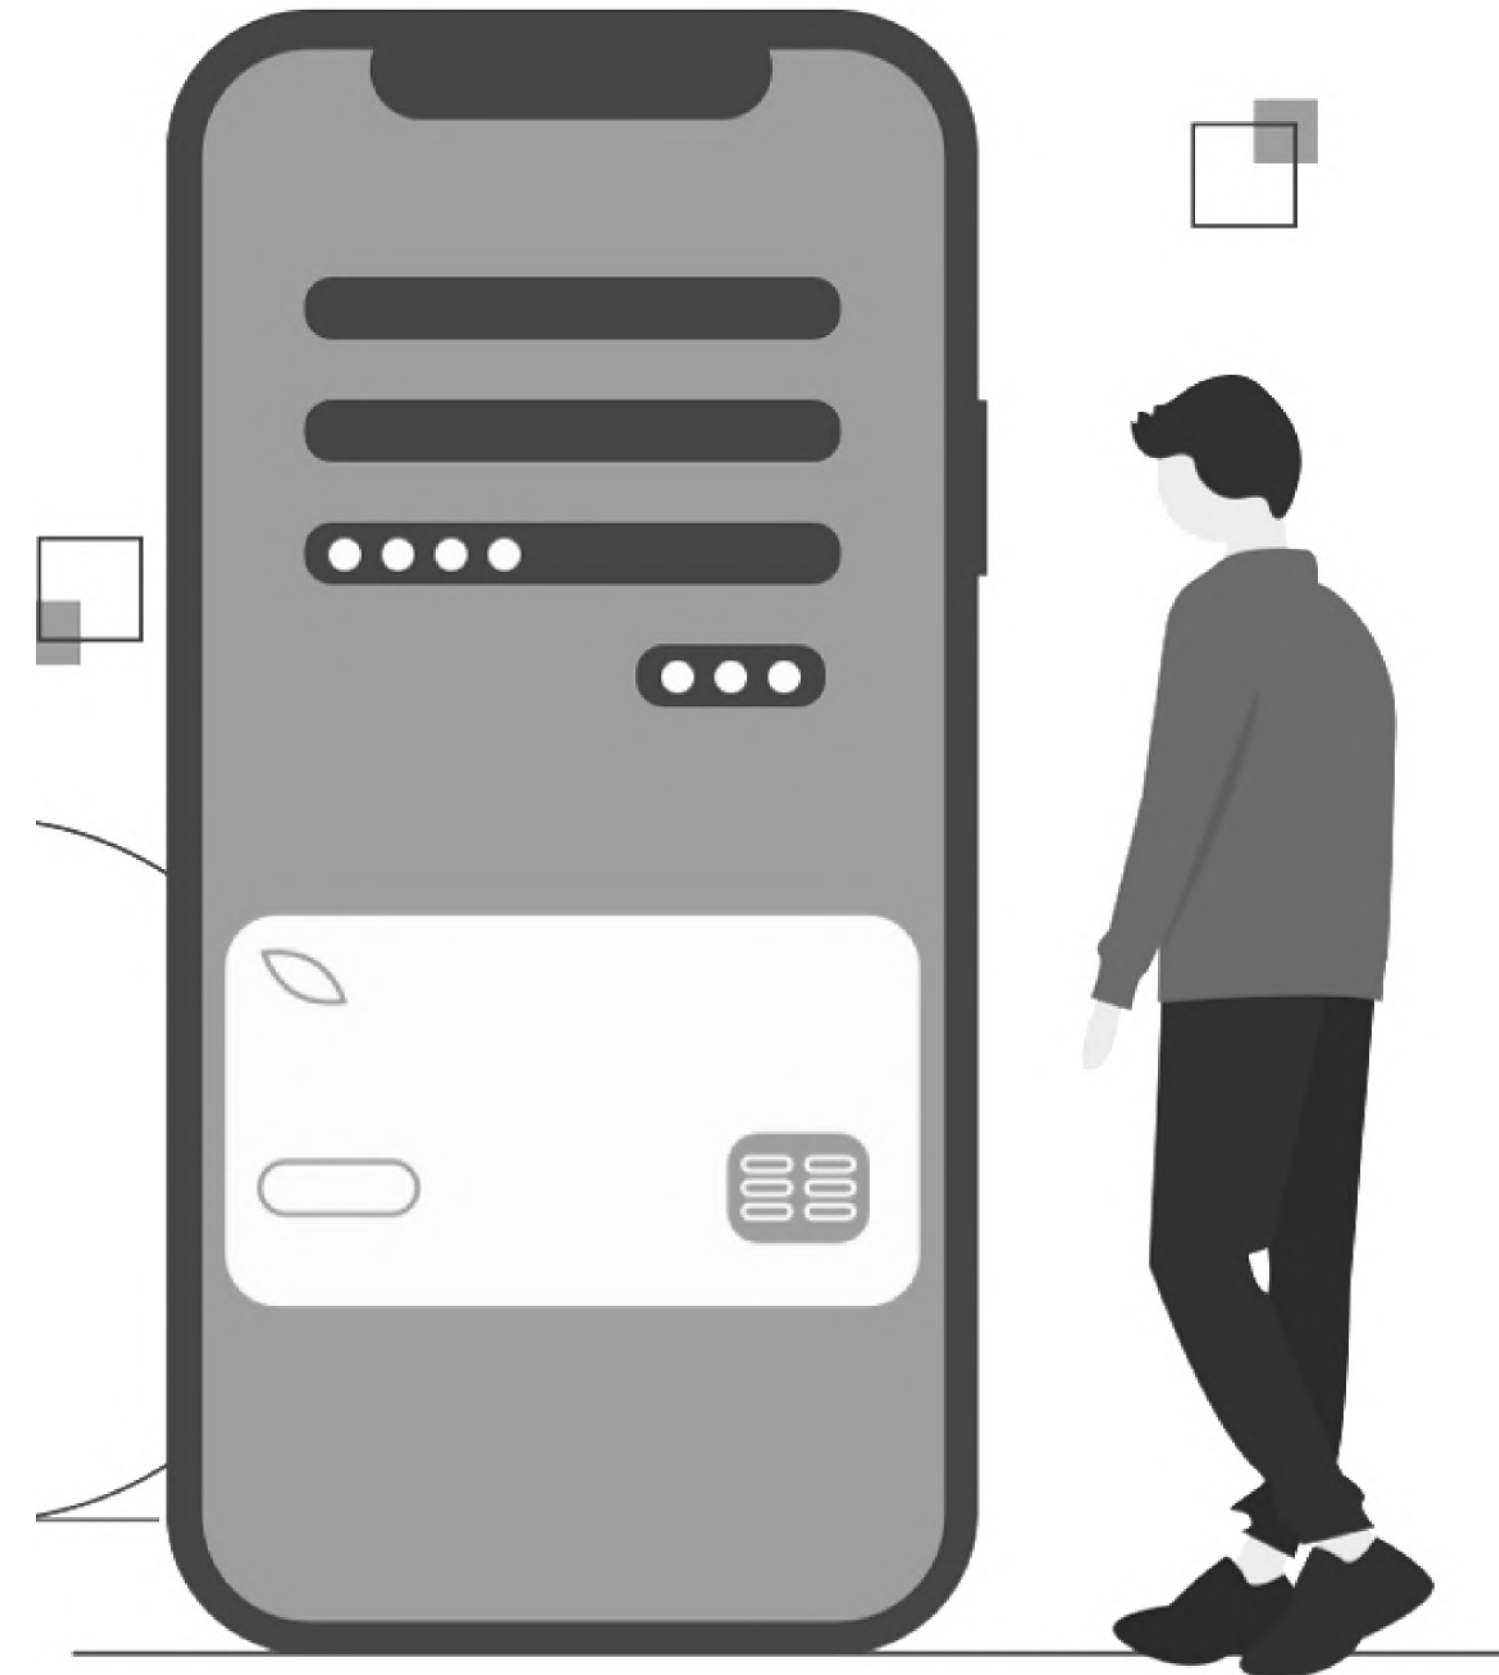

Language support

Local languages like Malayalam, Kannada, etc. are more user-friendly .

User Authentication

User authentication will be enhanced by verifying user signatures and photos using machine learning techniques.

Text to speech

Text to speech features to assist blind people
